

Vegetation Management Near You

To prepare for electric undergrounding, we will complete vegetation management activities, including tree trimming and tree removal, along the project route.

This work will start as early as Wednesday, Feb. 14, 2024, in areas within the public right-of-way and established Xcel Energy easements, and will continue for up to two weeks. Schedules are subject to change.

During this work, you may notice:

- Vegetation clearing or removal.
- Road and sidewalk closures.
- Traffic control.
- Parking restrictions.
- Temporary changes to business access.
- Temporary changes to RTD bus stops.
- Elevated levels of noise.

Following construction, all work areas will be restored to the conditions required by permits as weather allows. Work areas may be left temporarily restored after construction until we can complete the final restoration.

Overview

Xcel Energy will convert approximately 4,700 feet of existing overhead electric distribution lines to new underground distribution lines along the south side of Arapahoe Avenue, between Foothills Parkway and 55th Street in Boulder, Colorado.

Safety

Public safety is at the foundation of all we do. The safety of the public influences every decision we make. We proactively approach public safety by implementing safety measures before, during, and after construction. Please do not enter work zones for your and the crew's safety.

If you have questions or concerns, please reference the project contact information below, and we will respond within one business day.
